

Zombie Almighty

Final SOT - SideCharacter model, latest hint fit, and clean test route

1. Final Answer

Use this as the current final. Older A/B/C, 2x2, command, cosmetic, and Volt/mode theories are deprecated for clean testing.

Gender reroll exactly once

-> zombify same-gender targets through passive Blood Bar + knock + manual grip

-> discover the real count during one clean run: check 40 / 45 / 49 / 50

-> if count alone does not pass, complete the tail:

copy/mirror character appearance

plus same-gender final zombify/check while the mirror relation is active

2. Latest Hard Hint Map

Hint / constraint	Final interpretation
Gender Rerolling -> Zombifying -> ??? -> ???	The main route is one reroll, then a same-gender zombification count, then two tail checks. The old repeated-reroll A/B/C matrix is deprecated.
Only one gender reroll	Use exactly one gender reroll for the clean attempt. Extra gender rerolls are reset-risk and should not be part of the first route.
Same gender after reroll	After the reroll, every count target should match the quest holder's post-reroll gender.
Amount is 50-ish; 57 is too much	Run one staged count and check progress at 40, 45, 49, and 50. Do not waste time above 50 before tail probes.
Passive Blood Bar involved	Build the target's Blood Bar through the Zombie passive interaction. Avoid T/G/Z/X/C as the clean Blood Bar source.
Manual gripping required	Every conversion in the clean route must be knock -> manual grip -> confirmed zombie.
Zombies do not need to act	After conversion, the target does nothing. No return, die, invade, chat, emote, kill, or movement requirement.
Can be done in base / A grade / any world	No Volt, mode, raid, room, world, or high-grade transformation lock.
Any race; no other Quincy; no self-zombify	Targets can be ordinary players of any race. The quest holder does not need to become a zombie.
Items/accessories are not needed	If the tail uses appearance, treat it as character-copy/mirror state, not cosmetics, accessories, outfit, or item matching.
Same quest, different order / starting point	The tail A/B order may vary per player. Swap only the tail order after the core count; do not return to broad reroll matrices.

3. Clean Route

Step	Phase	Action
0	Preparation	Be on the Zombie Almighty step with Zombie equipped. Stay in base. Record current gender and server/world.
1	One gender reroll	Use exactly one gender reroll. The post-reroll gender becomes G for this run.
2	Pick targets	Use targets whose gender is G. Any race is allowed. Reuse is acceptable only if the server clearly counts it; fresh targets are cleaner for logs.
3	Passive Blood Bar	For each target, use the passive Blood Bar interaction. Do not use T/G/Z/X/C or Volt/mode as the clean setup.
4	Manual zombify	Knock the target, manually grip, and confirm the target becomes zombie. The zombie does nothing afterward.
5	Milestone checks	With Zombie still equipped, check Jugram/Balance only at 40, 45, 49, and 50. Do not talk while on the wrong Schrift.
6	Tail primary	If no pass by 50, copy/mirror another same-gender player's character appearance, then same-gender final zombify while that relation is active.
7	Tail order swap	If the primary tail fails, swap only the two tail checks: make/keep the mirror relation active before the final same-gender grip.

Step	Phase	Action
8	Stop condition	If both tail orders fail, stop and log. Do not add commands, mode, accessories, race locks, or extra gender rerolls.

4. Tail Direction Priority

If the count does not pass by 50, test the character-copy / mirror / gender tail before commands, mode routes, or old matrices.

Priority	Tail direction
1	Quest holder copies/mirrors the same-gender target, then grips that target while the relation is active.
2	Same-gender target copies/mirrors the quest holder, then gets gripped while the relation is active.
3	Two same-gender helper targets mirror/copy each other, then the quest holder grips one while the relation is active.

5. Why This Satisfies The Hints

Hint	How the final route satisfies it
Any world / base	The route only needs players, passive Blood Bar, manual grip, and NPC checks while on Zombie.
Zombification required	The core work is repeated real player zombification.
Blood Bar passive	Passive Blood Bar is the setup for every counted conversion.
Manual grip	The route avoids move auto-zombify and uses manual grip for credit.
Gender swap required	The one reroll is explicit and happens before the same-gender count.
Same-gender hint	The count targets match the quest holder's post-reroll gender.
You do it twice / two tail tasks	The visible route has count work plus two post-count checks; tail order can randomize.
TF2 autobalance us	The gender axis is the balancing constraint; male/female path identity matters without requiring a physical formation.
You will not know what you did	The exact count and tail direction can pass silently unless milestones and state are logged.
Become like them...then control their minds	Become the required gender state, then create/control zombies through same-gender manual zombification.
No commands / zombie action	The zombie exists as output; it does not perform the solution.
No accessories	The appearance hypothesis is character-state mirroring, not item or cosplay matching.

6. Do Not Add These

- Do not run the old MMM/MMF/MFM/MFF/FFF/FFM/FMF/FMM A/B/C matrix as the main route.
- Do not run the old MM x2 -> FF x2 -> MF x2 -> FM x2 matrix.
- Do not gender reroll repeatedly during a clean attempt.
- Do not use return, die, invade, zombie commands, emotes, or chat strings.
- Do not use Volt/mode, Implode, or move-only Blood Bar setup for the clean route.
- Do not require Quincy, Soul Reaper, Arrancar, a specific Schrift, a specific world, or a clan room.
- Do not require the quest holder to be zombified.
- Do not require items, accessories, name, outfit, or cosplay matching.

7. Result Logging

Run ID:
Date:
Quest holder:
Zombie equipped before NPC checks: YES / NO
Initial gender:
Post-reroll gender G:
Gender rerolls used: exactly one / other
Targets gender: same as G / mixed
Target races:
Passive Blood Bar method used:
Manual grip confirmed for every target: YES / NO
Zombie confirmed for every target: YES / NO
NPC at 40:
NPC at 45:
NPC at 49:
NPC at 50:
Tail direction tested:
Mirror/copy relation active: YES / NO
Final same-gender grip after mirror/copy: YES / NO
Commands used: NONE
Volt/mode used: NONE
Wrong Schrift NPC talk: NONE
Final NPC result:
Pass/fail/blocked:
Notes:

8. Confidence

Confidence is high for the mechanism family: one reroll, same-gender passive Blood Bar, manual grip, no commands, no mode, any race.

Confidence is medium for the exact count and mirror direction until an in-game NPC pass is logged. The best immediate test is CORE_M_50 or CORE_F_50 depending on post-reroll gender, with milestone checks at 40/45/49/50.
